Geometry Manager Pro is a free software that is downloadable from the PASS System.

Geometry Manager Pro

Geometry Manager Pro is a free software that is downloadable from the PASS System. Extended features of new and full geometric function. This software can be used for multiple screen set up.

Key Features

Geometric Adjustment - Images can be adjusted using interactive Free Grid overlay via PC with resolutions up to 11 x 11 lines (expandable to 41 x 26 lines* with optional ET-UK20). Users can adjust the position of control points on the grid to reshape the

Edge Blending - Control the brightness of individual projectors in a multi-screen system to make overlapping areas of images almost invisible. Geometry Manager Pro offers flexible black border adjustment for precise calibration of black-level in overlapp

Color Matching - Match the color reproduction range of three, seven, or Rec.709-compliant colors for individual projectors to ensure consistently uniform multi-screen image reproduction.

Projector control - Match the brightness of individual units and correct chroma levels to ensure consistent white- and color-brightness among multiple projectors. Selected models support automatic brightness calibration at periodic intervals.

Brightness Control - Lens settings, input-signal adjustment, and selected operations available via OSD menu can be performed via laptop rather than line-of-sight operation with the projector’s remote.
